Technical Skills

Languages: Python, PHP, JavaScript, HTML, CSS

Databases: MySQL, CRUD operations, API integration

Frameworks & Tools: Django, Flask, XAMPP, Git/GitHub

Systems & Networking: Linux fundamentals, CCNA Networking Essentials, hardware/software troubleshooting

Productivity & AI Tools: Microsoft Office, Excel, Canva, GitHub Copilot, ChatGPT

Additional Strengths

Communication, Teamwork, Problem-solving, Attention to detail, Adaptability, Time management, Willingness to learn

Profile

Junior Software Developer with hands-on experience building responsive web applications and database-driven systems using Python, PHP, JavaScript, HTML/CSS, and MySQL. Skilled in debugging, problem-solving, and applying Agile practices. Fast learner, adaptable, and eager to contribute to professional teams while expanding expertise in production-level software.

Education

2025

Software Development NQF5
Girlcode Group

2020

National Senior Certificate
Mdzili Secondary School

Experience

2025

Girlcode Group | Software Development Training & Work Readiness
Midrand, Gauteng

- Built, tested and debugged web/software development projects using modern development practices.
- Worked with Git/GitHub, APIs, databases and responsive web technologies during practical development activities.
- Applied Agile concepts, teamwork, communication and problem-solving in project-based learning.

2024

XP Squared | Brand Promoter
Johannesburg, Gauteng

- Collected customer feedback and shared insights with the team.
- Assisted customers with product enquiries and recommendations.
- Maintained a professional brand image while working toward promotional targets.

Projects

Developer Portfolio | HTML, CSS, JavaScript, GitHub Pages

Designed and deployed a responsive portfolio showcasing projects and skills.

Weather Application | JavaScript, API Integration

Built a responsive web app retrieving real-time weather data via API, improving usability with clean UI.

Django Voting System | Python, Django, MySQL

Developed a secure, database-driven voting application with CRUD functionality and structured backend logic.

AI Poem Generator | HTML, CSS, JavaScript

Created an interactive front-end project demonstrating event handling and API-oriented design.

Achievements

CCNA Networking Essentials – Cisco Networking Academy
NDG Linux Essentials – Cisco Networking Academy
Artificial Intelligence – NetCampus
